[5] Transportation (TR)

[5.14] Program to limit or decrease the parking area on campus for the last 3 years (from 2018 to 2020)

Description:

In response to the growing awareness of environmental sustainability, an ambitious initiative has been undertaken to expand public transport facilities, emphasizing the use of green energy. The imperative to reduce carbon emissions and promote eco-friendly commuting options has driven the decision to enhance and diversify the existing public transportation infrastructure. In response to dwindling private vehicle use, the university has implemented a transformative shift affecting nearly 800 faculty and staff commuting from various places. Eight new dedicated bus routes have been introduced as a sustainable and efficient transportation solution, aligning with broader eco-friendly goals. This initiative optimizes resources, fosters community among commuters, and addresses environmental concerns by reducing individual carbon footprints.
