

## **Manpreet Jivin**

I am grateful to the Department of Biotechnology, Karunya Institute of Technology and Sciences, for shaping me into the person I am today. With their unwavering support and commitment to education, I was able to achieve challenging goals throughout my four years of undergraduate study, all while maintaining a merit scholarship and graduating with distinction. I am also thankful for my friends, along with whom we won several Ideathon events as a team. I am proud to have represented the University Tennis team in the South Zone twice and have noteworthy accomplishments in corporate tournaments. I will cherish the memories of leading a hundred-voice choir in the University event (Megaplay'23), sharing the stage alongside brilliant musicians and vocalists.

I am also deeply grateful to the faculties who played a pivotal role in my academic journey. The encouragement and mentorship I received from them geared my academic accomplishments. I am indebted to them for equipping me with the knowledge and skills that allowed me to work as an intern at the Indian Institute of Science Education and Research (IISER), Tirupati, where I further honed my skills and expanded my knowledge in the field of Genetic engineering.
