

Successful treatment with new technique

- This patient came with Fournier's Gangrene abandoned to die after treatment for a week at Coimbatore. The condition has 80% mortality
- He recovered by God's grace with the treatment with locally designed topical vacuum therapy unit.

Thank you

- We sincerely thank Dr. S.P. Gnanavolivu an orthopedic surgeon from UK and Dr. Pandyan a surgeon from Florida who came and helped us with surgeries and some disposables

Meeting with YWCA

- The YWCA and other women's self help groups are enrolling in our Health care plans
- The Reach team of SEESHA had several meetings with them

SILS @ SEESHA - KRCH

- Single Incision Laparoscopic surgery {SILS} is the latest fad in advanced laparoscopic surgeries
- We performed the first low cost SILS this month. SILS cholecystectomy, appedicectomy, ovarian cystectomy, LAVH, etc. are available here

Orthopedic surgery @ KRCH

- The first major orthopedic surgery was carried out at SEESHA – KRCH this month.
- Mr. P had spent over 100000 and came with a mal - united fracture and a non – healing wound

ORIF @ SEESHA - KRCH

- Topical vacuum therapy, skin grafting produced excellent healing
- The fracture was fixed thanks to the visiting doctors and lent equipment
