

Arthur Vimal
Associate Global Feasibility Manager
IQVIA (formerly called Quintiles and IMS Health)
Attachments area

I will always stay grateful to Lord for the opportunity of spending 6 academic years in Karunya University – it's truly a home away from home. My time at Karunya and at School of Biotechnology, taught and molded me for the corporate exposure – interestingly the first company I was hired at, had a manager who always have high regards for graduates from Karunya University due to their high ethical and quick to adapt abilities– this clearly shows the excellence and the trademark every engineer gets when leaving Karunya.

I'm currently employed in a fortune 500, Human Data Science Company working on Allergy, Respiratory, and Infectious diseases and vaccines clinical drug development process.
